I created another job and I have put together a step by step list of what caused this issue to occur.

1. Started Worker 1 and scanned 5 units while online.

Job No: SRO1812-722 Property: Santa Rita Block: R1 Lady in Red Job Type: Picking [Export CSV](#)

Show 10 entries Search:

4. Went offline, finished and re-started worker 1 before scanning 5 units.
5. Went online and re-freshed the live job report.

6. (While offline a worker cannot create more then one session row) so 5 units that were previously scanned, had been added to the original session row, bringing the unit count to 10.
